

Linux

What to send me?

1. Question 1 terminal print screen

```
daniell@daniell-VirtualBox: ~/Music
daniell@daniell-VirtualBox:~$ cd /home/daniell/Documents
daniell@daniell-VirtualBox:~/Documents$ echo 123 >> word.txt
daniell@daniell-VirtualBox:~/Documents$ cat word.txt
123
daniell@daniell-VirtualBox:~/Documents$ cp word.txt /home/daniell/Music
daniell@daniell-VirtualBox:~/Documents$ cd /home/daniell/Music
daniell@daniell-VirtualBox:~/Music$ vim word.txt
daniell@daniell-VirtualBox:~/Music$ cat word.txt
Cohen
daniell@daniell-VirtualBox:~/Music$
```

2. Question 2 print screen

```
daniell@daniell-VirtualBox:~$ sudo apt-get install vlc
[sudo] password for daniell:

Processing triggers for libc-bin (2.2
daniell@daniell-VirtualBox:~$ synapti
Gtk-Message: GtkDialog mapped without
daniell@daniell-VirtualBox:~$ vlc
VLC media player 2.2.2 Weatherwax (re
[00000000013fe088] core libvlc: Runni
c' to use vlc without interface.

```

The second part of the screenshot shows the VLC media player interface with a traffic cone icon and playback controls.

3. Question 3 – Connection established screenshot.

```

NetBSD 8.0_BETA (GENERIC) #5: Wed Apr 11 17:56:49 EDT 2018

SDF is a NetBSD development site. We are the largest NetBSD installation in
the world. Because of this the SDF cluster serves as a testbed for future
NetBSD releases. We are currently testing the new NetBSD-8 release and are
working through a short list of bugs. If the SDF cluster is unavailable,
check http://www.sdf.org for NetBSD developer status. Debugging takes time
but is much faster with a live system.

Thank you for supporting NetBSD, a free alternative to Linux and Windows Server
