Creating Google Maps API key

1. Go to https://console.developers.google.com
2. Press ⊞ ENABLE APIS AND SERVICES
3. In the search text box search for : **Places**

4. Choose **Places API**:

Places API

Google

Get detailed information about 100
million places

5. Press **Enable** → ENABLE

6. Wait for the API enabling process to end:

Enabling API

7. Press on **Credentials**

← Places API ▪

Metrics   Quotas   Credentials

8. Press Create credentials → API key:

9. Copy the key you just created (starting with Alza):

10. Close the window and use the key at the end of the URL in your homework (Second question).

** IMPORTANT NOTE:

It might take a few hours until key will start to work, in which case you will have to wait..
